| About Myself

```
|----------------------------------------------------------------------------------------------------
```
| My name is Ahsan Ali, a Software Engineer from Pakistan currently residing in Al Khafji,
| Saudi Arabia. I hold a valid and transferable Iqama. I am a passionate and driven Software
| Engineer with four years of backend development experience. My core expertise lies in
| PHP (Laravel), and I am actively working with MERN stack technologies and Go (Golang).
| I continually seek opportunities to grow with emerging technologies.

| Experience

| Laravel Team Lead & Node.js Developer

| Software Flare Pvt Ltd (Remote) | 2025 – Present (6 months)

| — I've always been passionate about MERN stack technologies. After dedicating nearly a
| year to self-learning, I requested to join the MERN stack team at my company, and
| fortunately, my request was accepted. When the company relocated, my job role
| transitioned to a remote position. I currently lead the Laravel team while contributing to
| MERN projects. In my free time, I enjoy building with Go (Golang) — I proudly consider
| myself a gopher.

| PHP Laravel & MERN Stack Developer

| Software Flare Pvt Ltd | 2022 – 2025 (about 2 years)

| — Hard work truly pays off. After completing a seven-month internship (4 months at
| Software Flare, 3 months at NestTech), my performance was recognized and I was
| offered a full-time position as a PHP Laravel Developer.

| PHP Laravel Intern

| Software Flare Pvt Ltd | 2022 – 2022 (4 months)

| — Halfway through my internship, I received another opportunity at a larger company
| offering a stipend. As my future was unclear in my current internship, I grabbed the
| chance without hesitation.

| PHP Laravel Intern

| NestTech Ventures | 2022 – 2022 (3 months)

| — After completing my Bachelor's degree, I began learning web development, focusing
| primarily on PHP, and applied for internships. After a full year of persistence, I landed a
| six-month unpaid internship with a potential job offer depending on vacancy availability.
